Cod. 01.04.00005 Rev. 00

General Information

The **BNA Small** from the "Black ARM" series are Deposit Cash Boxes suitable for small and medium-sized shops and retail chains. They allow you to deposit cashed banknotes by inserting them into the safe via the Acceptor, thus securing them and verifying the transaction. If the connection to the banking circuit is activated, it is possible to obtain credit to your current account.

- **Voice guide:** operations guided by voice prompts

Glossary of Terms

Below are the most important terms regarding the use of the BNA SMALL safe.

BNA: Bank Note Acceptor: This is the name given to the Deposit Boxes produced by ITALDES.

DEPOSIT: These are the operations of depositing banknotes into the BNA, which are effectively a deposit into the bank account. The banknotes inserted into the insertion acceptor (1) are counted, verified, and accepted. Once accepted, they cannot be recovered. The acceptor can It can be removed by pressing the yellow button (2).
SAFEBAG: Self-sealing plastic security bag with a unique EAN code, for securing valuables that must be inserted into the designated slot (4).

SAFE BAGS (3 - Optional): Lower security compartment with independent opening via a mechanical key. It is intended for the manual deposit of envelopes, documents, or valuables that must not be processed by the electronic acceptor.

DEPOSIT SESSION: the entire procedure, from reading the Deposit card to printing the receipt.

WITHDRAWAL: The operation of withdrawing valuables deposited inside the BNA. The operation is the responsibility of the Cash Transport company.
