Positioning of banknotes - BNA F

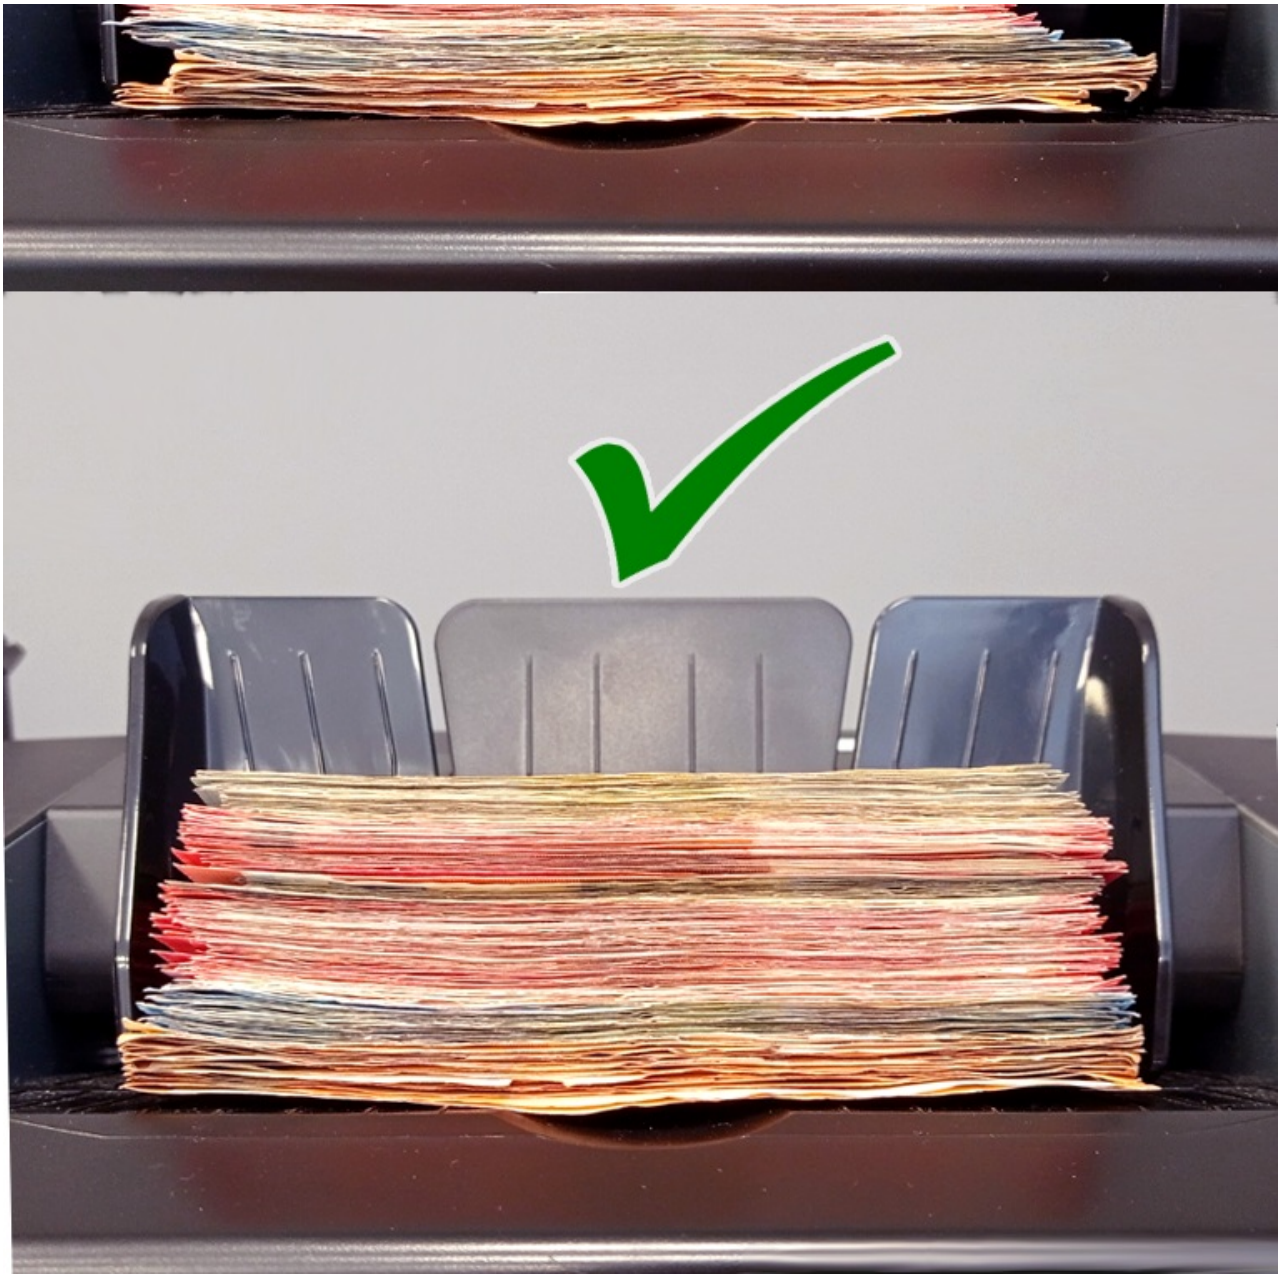

Instructions on how to correctly place bills on the acceptor tray.

Align the bills

Once placed on the tray, do not leave the bills free to move sideways; move the note-aligning flaps to keep the bills aligned. **Note:** The flaps should NOT be too wide, but not too narrow either, as this would prevent the acceptor from picking up bills from the tray.

Arrange the bills parallel to the tray

Arrange the bills parallel to the tray. Do not insert them into the slot where they will enter the acceptor.

Do not place folded banknotes

Avoid placing banknotes folded or curved trying to make it as much as possible possible linear with the tray.

Do not touch the bills on the tray

Do not touch or press the bills while the acceptor is picking them up from the tray. The acceptor is designed to pick up the bills correctly without any weight pressing on them. Disturbing the feeding of the bills can cause serious injury. cause **deposit errors.**
